# Tendam Global Fashion Retail

|                           |          |
|---------------------------|----------|
| <b>Your Company Score</b> | <b>B</b> |
| Activity group average    | <b>B</b> |
| Regional average          | <b>C</b> |
| Global average            | <b>C</b> |

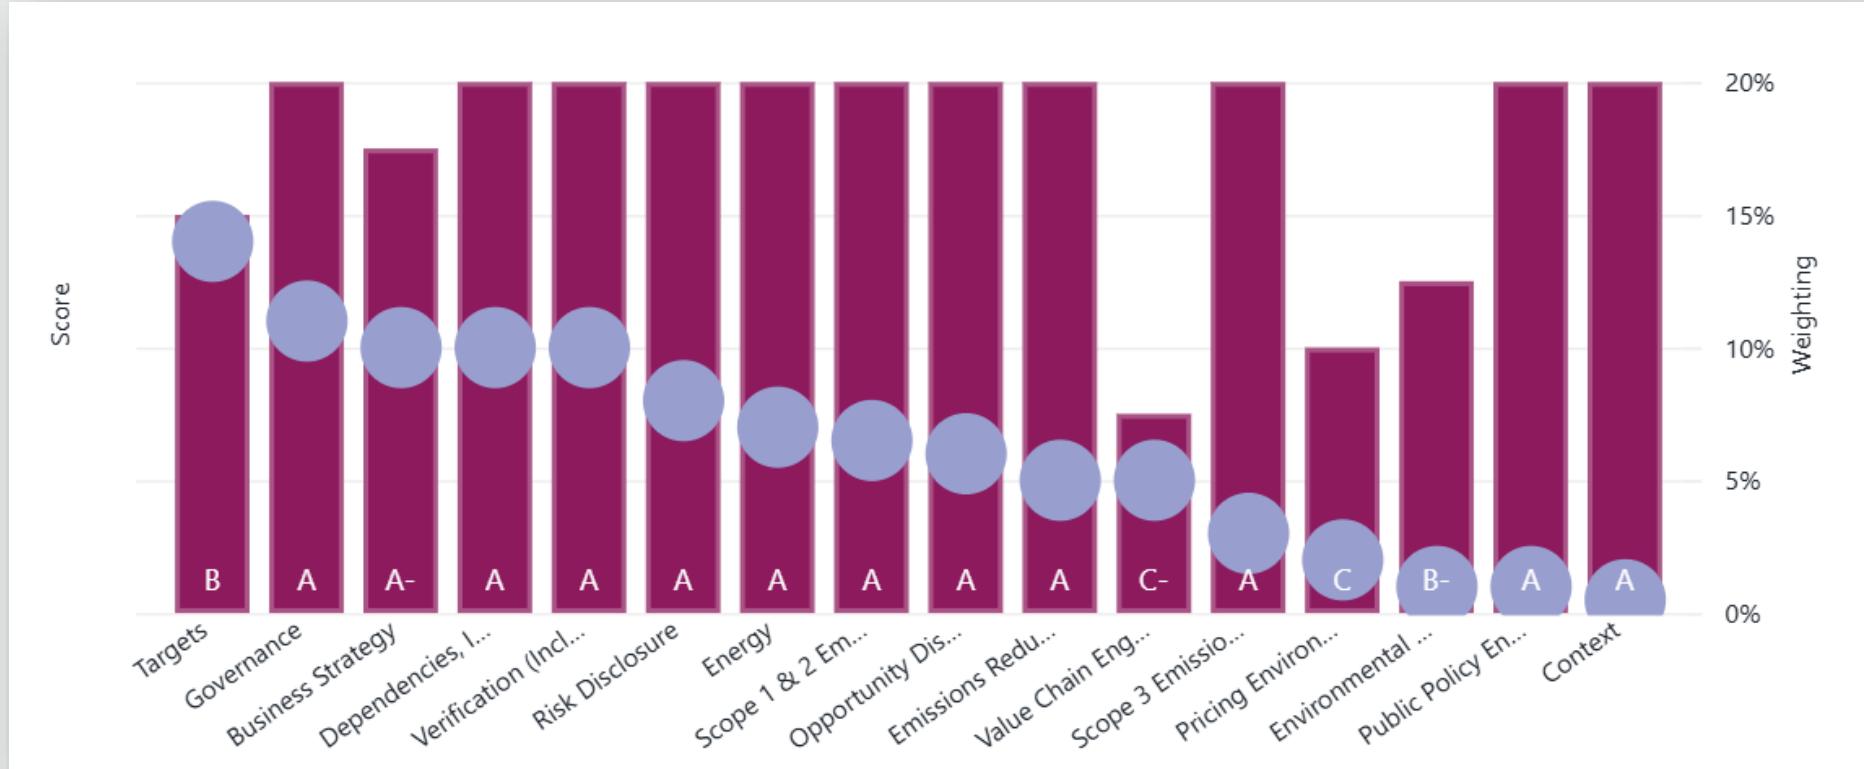

CDP recognizes that organizations operating in different primary sectors are affected by and manage environmental issues in alternate ways. To capture this sectoral specificity in the calculation of the final score, CDP utilizes a weighting system during the score calculation at Management and Leadership levels.

All scored questions in the questionnaire are allocated to a scoring category for each scored environmental issue area. The weighting of each category reflects its relative importance for the sector in the overall score.
